

Spring Hill, FL

## Software Engineer | Web Developer

Dynamic and detail-oriented Software Engineer and Web Developer with **3+ years of experience** in developing and optimizing web applications. Skilled in React, React Native, Javascript, Typescript, HTML5, CSS, PHP, and GraphQL. Proven ability to enhance user interfaces and modernize codebases. Certified in Full Stack Software Engineering and UI/UX design. Strong collaborator with a history of working closely with development teams, product managers, Designers, and peers to deliver high-quality software solutions. **Bilingual in English and Spanish**. Seeking a challenging role to leverage technical expertise.

## Languages & Tools

**Languages:** React | React Native | PHP | Laravel | Angular | Vue | Javascript | Typescript | HTML5 | CSS | Bootstrap | Tailwind | NextJs | AWS | Bash | TRPC | NextJS | C | GraphQL | Python | SQL

**Tools:** Cypress | Git | Github | Gitlab | VS Code | Figma | Trello | Insomnia

## Work Experience & Projects

### MISTR | Software Engineer / Web Developer / UI/UX Designer

Aug 2024 - present

- **Designed and developed a full-scale healthcare dashboard app from scratch**, leading both **frontend and backend development** to ensure a seamless and efficient user experience.
- **Built and optimized APIs, endpoints, and database interactions**, improving performance, scalability, and data reliability for healthcare operations.
- **Led UI/UX design and implementation**, ensuring intuitive workflows and a cohesive user experience tailored for healthcare professionals.
- **Established best practices and documentation**, enhancing maintainability and supporting future development across cross-functional teams.

### Coqui Health | Software Engineer / Web Developer

Mar 2023 - Jul 2024

- Developed healthcare software and cloud services, utilizing cutting-edge technology and innovative **data integration** techniques, resulting in a 25% increase in **operational efficiency**.
- Designed and **implemented user interface features** for a telemedicine application, enhancing user satisfaction by 30%.
- Maintained and updated the **front-end codebase**, ensuring optimal performance and responsiveness, which reduced load times by 20%.
- Actively participated in code reviews, offering constructive feedback, improving code quality by 15%.
- Collaborated with product managers to gather and understand requirements for feature development, **leading to the successful delivery of 10+ new features**.

### CoinTrace | Project

in Development

- Developed CoinTrace, a money tracking app, from scratch, prioritizing simplicity and accessibility for users.
- Utilized **React Native** and **Typescript** to build the app, ensuring a robust and scalable codebase.
- Created a user-friendly design system in **Figma**, enhancing the app's user experience with intuitive and seamless navigation.
- Ensured the app is completely free to use without compromising any important data, offering users a reliable and secure tool for tracking their finances.

**Patient Onboarding System | Web Developer**

Sep 2023

- Designed and implemented a user-friendly, streamlined patient onboarding system, increasing new patient registration efficiency by 40%.
- Leveraged NextJs for server-side rendering and **React** for dynamic frontend interactions, improving page load speed by 25%.
- Integrated frontend components with backend microservices built on **Typescript** and **GraphQL**, enhancing data processing speed by 30%.
- Ensured seamless data flow and communication between frontend and backend, reducing **data synchronization** issues by 50%.

**Hyperion Finance Inc | Software Engineer / Web Developer**

Sep 2021 - Feb 2023

- Led a full-stack redesign of an all-in-one financial services app, improving user engagement by 35%.
- Utilized **React**, **React Native**, **Typescript**, and **GraphQL** to update the application, enhancing performance by 30%.
- Conducted development, debugging, optimization, and automation, reducing deployment time by 20%.
- Modernized outdated code bases, significantly improving overall functionality and reducing maintenance costs by 25%.
- Collaborated with fellow engineers to evaluate and enhance software and hardware interfaces, increasing system stability by 40%.

**Education & Certifications**

**Full Stack Software Engineer & Web Developer** - Holberton: School Of Computer Science  
**UI / UX Design Process** - Atheros Learning
